SmartCella 3PH

Stand-alone solution

- Full three-phase cold room management (3 three-phase loads, including compressor)
- SmartCella parameters, logic and user interface
- Main switch (disconnect) on panel door
- Additional LED indicator for load (contactor) status

Easy to install/use

SmartCella 3PH is a stand-alone, all-in-one controller for three phase cold room management.

It uses **the same interface and control logic as the standard SmartCella (IR33+)**.

Cold room status can be monitored by the **additional load LED indicators** on the front door of the panel, providing immediate feedback on load (contactor) status and a clear overview, even from a distance, about alarm events on the panel.

Complete **terminal box** with ample space for easy and quick wiring.

Flexible solution

Compressor protection is provided by a safety switch with adjustable current threshold from 1.6 A to 16 A (for 5.5 to 7.5 HP compressors).

Input signals

- 2 NTC probes, for **room** and **defrost temperature**
- **Door switch**
- 1 additional NTC probe or digital input that **can be configured**

Safety inputs

- **LP pressure switch** (pump down)
- **Fan thermal protection**
- **Defrost heater thermal protection**
- **HP/LP pressure switch**
- **Kriwan protection**

Load outputs

- **Compressor** and **condenser fan**
- **Evaporator fans**
- **Defrost heaters**
- **Cold room lights**

Functional outputs

- **Solenoid valve**
- **Compressor crankcase heater**
- **Kriwan power supply**

Safety and protection

All SmartCella 3PH models also include a **main disconnect switch** accessible from the front door of the panel, in addition to the circuit breakers for the loads managed.

Power 3PH module

Modular solution (SmartCella / UltraCella)

- Three-phase defrost management
- Protection by 4-pole circuit breaker
- Pre-wired with contactor coil wires

Plug&Play solution

Power 3PH module is an add-on module for **SmartCella** and **UltraCella** that allows the management of one three-phase load, typically defrost heaters.

Easy access to the circuit breaker through the module's door. No more need to build a custom panel with three-phase contactor, Power

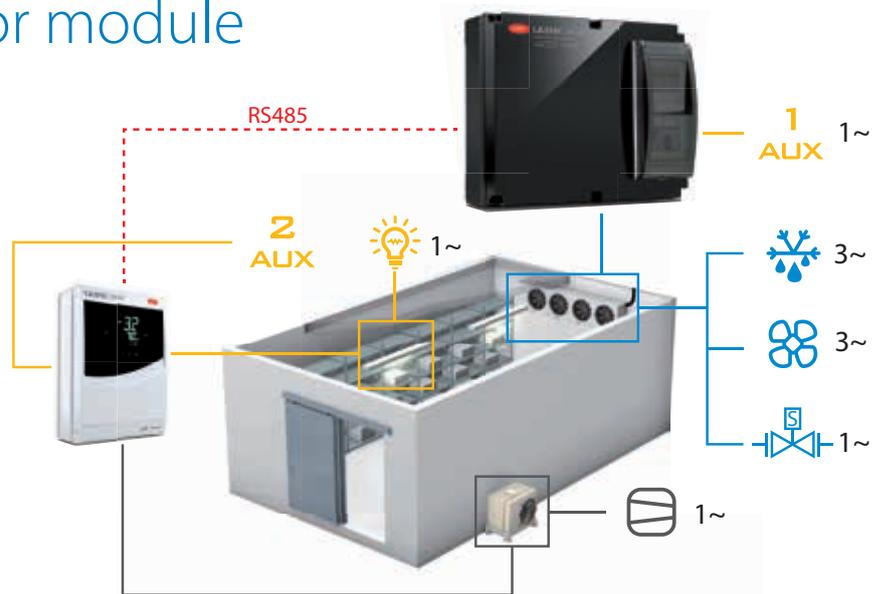

3PH module is pre-wired, ready to be assembled and connected to the main controller, saving installation time.

Ultra 3PH evaporator module

Modular solution (UltraCella)

- Three-phase evaporator fan and defrost management
- RS485 serial connection split solution
- Reduces installation time and cost compared to standard solutions

Complete evaporator management

Split solution for **UltraCella** that allows management of three-phase fans and defrost heaters. Remote installation, connection to UltraCella via RS485 serial line.

Lower total cost of ownership thanks to reduced cable length: even the temperature probes (such as the

evaporator probe) can be connected directly to the remote module.

Inputs

- 2 NTC probes, for defrost temperature
- Fan thermal protection
- Defrost heater thermal protection

Outputs

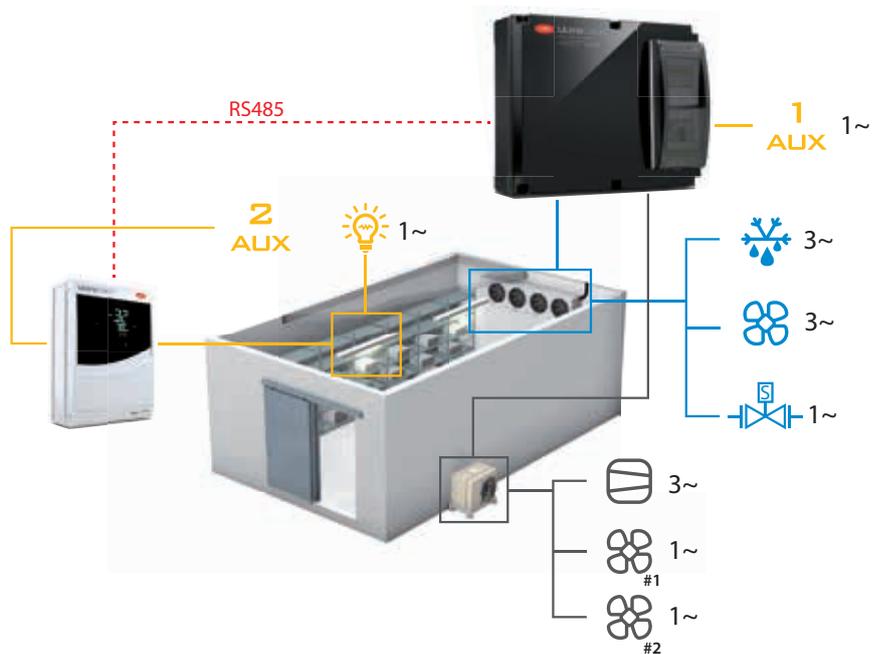

- Solenoid valve
- Evaporator fans (also 0-10 V)
- Defrost heaters
- AUX output

Ultra 3PH FULL module

Modular solution (UltraCella)

- Full three-phase cold room management (3 three-phase loads, including compressor)
- RS485 serial connection split solution
- Reduces installation time and cost compared to standard solutions

Complete cold room management

Split solution for **UltraCella** that allows to manage three-phase cold room, compressor included. Remote installation, connection to UltraCella through RS485 serial connection.

Lower total cost of ownership thanks to reduced cable length: even the temperature probes (such as the evaporator probe) can be connected directly to the remote module. Compressor protection is provided by a **safety switch with adjustable current**

threshold from 10 A to 20 A (for 4 HP to 7.5 HP compressors).

Inputs

- 3 NTC probes, **condenser** and **defrost temperature**
- **LP pressure switch** (pump down)
- **Fan thermal protection**
- **Defrost heater thermal protection**
- **HP/LP pressure switch**
- **Kriwan protection**

Outputs

- **Compressor**
- **Condenser fans (#1 and #2)**
- **Evaporator fans** (also 0-10 V)
- **Defrost heaters**
- **Solenoid valve**
- **Compressor crankcase heater**
- **Kriwan power supply**
- **AUX output**
